

SOI Asia is proud to announce Advanced Topics for Marine Technology and Logistics 2012. This Course will be conducted by Tokyo University of Marine Science and Technology and SOI Asia will support the online broadcast for all partners. KUET as a partner of SOI Asia will participate the course by online. Live lectures will be directly broadcasted from the SOI Asia Project (Japan) and Central Computer Center of KUET will receive live streaming of lectures at server room according to the following schedule. Interested faculty members, post-graduate students and 4th year students of undergraduate program are requested to attend the Lecture Series. All interested participants are requested to register at Central Computer Center as early as possible.
